

# CCES 2020 Breakdown

From **January 1, 2020**, to **December 31, 2020**, Transport Canada had received a total of **105** occurrences involving what was interpreted as Drones, Unmanned Aerial Vehicles, or Unidentified Flying Objects. **72** less from **2019**, a **41%** decrease, making the yearly average **141** events per year.

These **105** events from the year **2020** have been charted as follows:

Location Data

# The Canadian Current Event Survey - CADORS Events Involving UFOs and

## Ryan Stacey

## Category Data

The following data displays how these events were categorized when the Transportation Safety Board of Canada received the reports.

***\*Fireworks and Airplane were new categories in 2020***

***\* \* \****

## The Canadian Current Event Survey - CADORS Events Involving UFOs and

The following data displays how the objects in these events were described when the CADORS reports were created.

***\*Balloon, Fireworks, Kite, RPAS, CIRVIS and Shiny Object were new words used in 2020***

***\* \* \****

My interpretation of this 2020 data are as follows:

- 42% of the events occurred in the province of Ontario
- 96% of the events were below 500 feet Above Sea Level
- 96% of the circumstances involved a singular object
- 77% of the events occurred during day time hours
- 83% of the events occurred between May and November
- 86% of the events are placed in categories belonging to commonly known objects
- 90% of the events are described as known objects by the person(s) involved in these events

Commonly Known Relevant Facts:

- Ontario currently has the largest population in Canada \*ref
- The maximum altitude to fly commercial drones in Canada is 400 feet Above Ground Level \*ref
- It is challenging to operate more than one Drone/UAV at a

PRESENTS: The 2020 Canadian Current Event Survey (CCES)

Transport Canada collects aviation occurrence information through the Civil Aviation Daily Occurrence Reporting System (CADORS). The purpose of the system is to provide initial information on events involving any Canadian-registered Aircraft and events which occur at Canadian airports, in Canadian sovereign airspace, or international airspace for which Canada has accepted responsibility.

The Transportation Safety Board of Canada is the official source of aviation accident and incident data in Canada.  
<https://bit.ly/Zu7Fneh>

Below is a table compiled of information pulled from the above reporting system to assist in generating trends among Drones, Unmanned AV and possible Unidentified Flying Objects.

Rows highlighted in Green had questionable characteristics deemed worthy of requesting Access to Information under the Access to Information Act.

The purpose of this survey is to inform and educate the public in their individual quest towards UFO Disclosure.
